👤 PROFESSIONAL SUMMARY

A results-driven Full-Stack Developer with 5+ years of experience designing, building, and maintaining scalable web applications. Strong expertise in Java, Spring Boot, ReactJS, Angular, and modern database technologies. Skilled in system integration, production issue resolution, and secure application development. Committed to continuous learning and contributing to impactful solutions in cross-functional teams.

🗂️ WORK EXPERIENCE

PT. CHUBB Life Insurance Indonesia
Full-Stack Developer | Sep 2021 – Aug 2025

- Developed internal applications based on Business Requirement Documents (BRD).
- Resolved production issues and remediated vulnerabilities identified by AppScan and penetration testing.
- Monitored and troubleshot failed cron jobs on a daily basis.
- Authored technical documentation including SIT plans, SRS, and runbooks.
- Supported UAT deployment and assisted production rollouts.
- Integrated third-party services such as IPAY88 (payment gateway) and Infobip (SMS & WhatsApp).
- Generated reports using BIRT and iTextPDF.
- Managed source control using Git and followed versioning best practices.

PT. Micronet Gigatech Indoglobal
Full-Stack Developer | May 2019 – Sep 2021

- Designed and implemented full-stack applications based on user requirements.
- Diagnosed and resolved critical production issues to maintain system stability.
- Presented system features to users and led functional testing sessions.
- Created dynamic reports using Jasper iReport.
- Maintained source code using Git for version control and collaboration.

Tazkia IIBS Malang
Web Programmer | Oct 2018 – Jan 2019

- Built web applications aligned with stakeholder requirements.
- Investigated and corrected bugs to improve application performance.
- Organized team tasks using Trello and ensured timely delivery.

PT. Indonesia Power
Internship – Web Developer | Aug 2017

- Assisted in building a web-based data system for operational unit monitoring.
- Participated in application development and system documentation.
